

EcoRunner59 Gen2

EcoRunner59 Gen2x

The second generation of the TRYGONS EcoRunner59 is the largest and most stable boat in the category of plastic boats with power up to 115 hp. It is also the largest boat that can be towed by a simple car, with a total trailer weight of less than 800 kg (boat, engine, basic equipment, trailer). It is extremely easy to handle, can escape difficult situations without special knowledge due to wave piercing and the ability to glide very slowly. It has from 2 to 4 comfortable seats (2 optional and reclining) to "host" 6 persons and a comfortable sun lounger.

It is safe, with excellent cruising even in prohibitive weather conditions. It is flexible - suitable for family trips, as it has enough space for children and all kinds of luggage, while it will be equally enjoyed by a diver / spearfisherman or a surface fisherman.

The biggest possible upgrade for someone who already has a 40-70 HP engine in a smaller boat but also the largest boat that can be driven or rented (in Greece) without a speedboat license.

Technical Specifications

Length	5,90m
Beam/Width	2,24m
Draft	0,34m
Weight	440kg/450kg EcoRunner59 Gen2(x) (without engine)
Persons	6
CE	D / C
Fuel Tank	25-30ltr
Fresh Water	N/A
HP	30-70HP EcoRunner59 Gen2 /30-115HP EcoRunner59 Gen2x
Max Speed	40 knots
Fuel Consumption Cruise	0.55 ltr/nautical mile @ 70HP, 4300rpm, 23 knots, 200kg load
Hull Design	TRYGONS semi wave-piercing
Material	15mm biaxial sandwich polyester (hull, deck, parts)
Construction Process	100% vacuum resin infusion process with cure control. Class-A gelcoat finish.
