

RedFin 50

The new TRYGONS RedFin50 is an impressive modern 5-meter boat with amazing performance. The design of the hull is based on 12 years of experience in wave piercing boats specializing in the very demanding conditions of the Greek seas.

The plastic parts of the boat are made using multiaxial glass fabrics, entirely with sandwich infusion providing 15mm thickness of hull and deck. The boat has a satisfactory performance even in a 30HP engine, while its stability is impressive.

Technical Specifications

Length	4.99m (5.65m with transom extensions option)
Beam/Width	2.2m
Draft	26cm
Weight	330 kgr (without engine)
Persons	6
CE	C
Fuel Tank	25lt (optional additional 82lt internal installation)
Fresh Water	43lt optional
HP	30-70HP
Max Speed	28-36 knots
Fuel Consumption Cruise	0.5 lt/Nautical mile @ 22 knots (60HP YAMAHA)
Hull Design	TRYGONS semi wave-piercing pad hull design
Material	15mm biaxial sandwich polyester (hull, deck, parts)
Construction Process	100% vacuum resin infusion process with cure control

Additional Colour Options
